

# Customer Segmentation Marketing Analysis

By: Jadi Smith

# Problem Statement

Assist a Fresh Harvest Grocer, operating with a tight budget, in optimizing its products identifying the customer segment most inclined to purchase the product. By targeting this specific segment, the business can effectively allocate resources, ensuring that marketing efforts are not wasted on customers unlikely to convert, thus maximizing return on investment.

# Analysis

DC

FE

ML

## Data Cleaning

- 2240 observations
- Removed null values, dropped unnecessary columns

Income was the only column with null values (24 missing)

## Feature Engineering

- Aggregated old columns
- Introduced new columns

Ex: introduced Age, and Household Size

## Machine Learning

- Built clustering model
- KMeans with PCA

0.13 silhouette score

# Exploratory Data Analysis

## Question

Customer demographics?  
Spending?  
Response?

## Answer

Average Age: 54.5  
Average Spent: \$304.73  
Total Accepted Campaigns: 1450

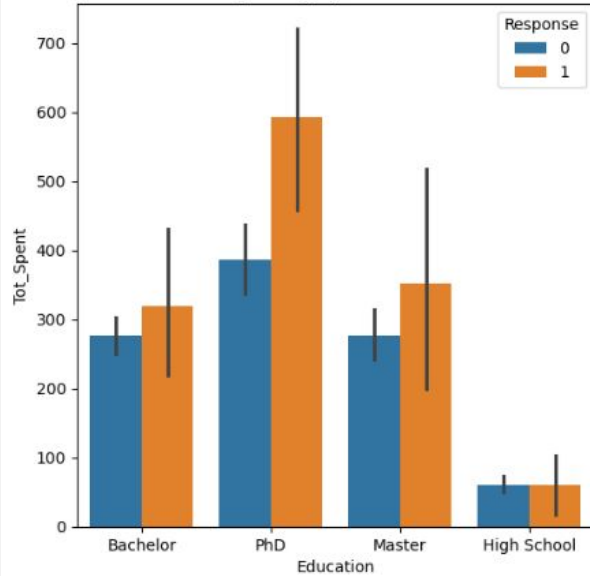

Distribution of Customer Age and Enrollment Age

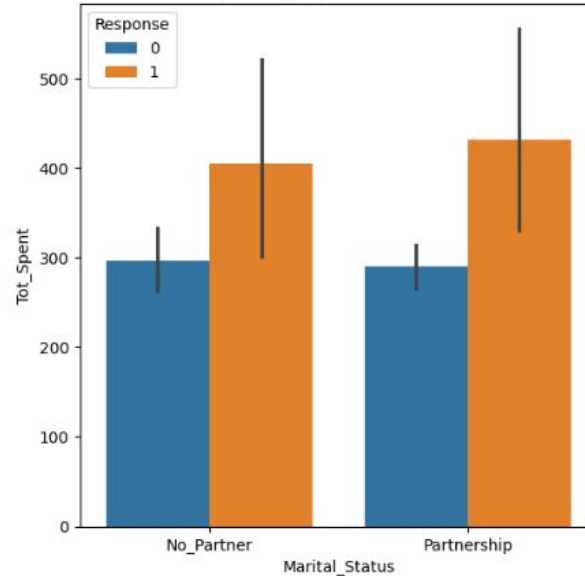

- Difference between average age and enrollment age
  - Avg Age = 54.5
  - Enroll Age = 43.6
- Customer has longevity with the company, engaging with the company for a considerable period, during which they aged

## Spending by Customer Demographic Based on Response

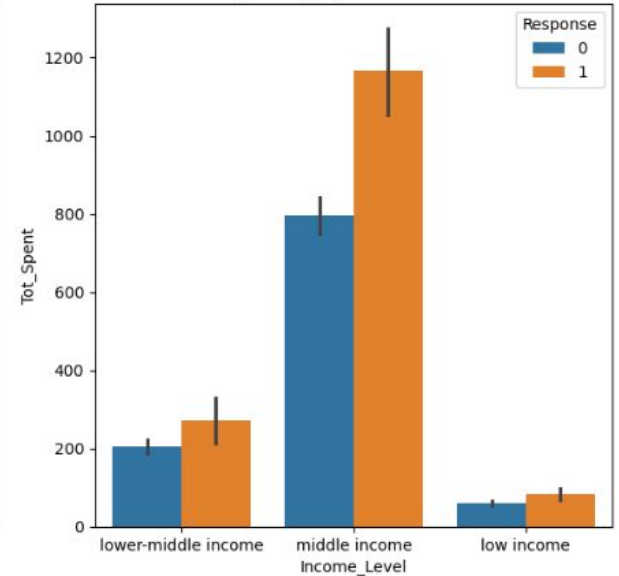

Spending by Education

Spending by Marital Status

Spending by Income Level

# Customer Segments

**Customer**

**0**

Age: ~ 60 | Bachelor's, Partnered, Middle Income

**Customer**

**1**

Age: ~49 | Bachelor's, Partnered, Lower Income

**Customer**

**2**

Age: ~58 | Bachelor's, Partnered, Upper-middle income

**Customer**

**3**

Age: ~55 | Bachelor's, Partnered, Lower-middle income

Few customers have accepted the company's campaigns.

- Segment 3 customers are less likely to accept campaigns
- Segment 2 customers show declining acceptance rates across campaigns

Average Spending by Cluster on Products

- Customers in segment 2 spend the most out of all customers
- The top product they favor is wine

# Conclusion & Recommendations

We should target customers in segment 2 with different wine campaigns. This includes customers

- in their late 50s with a Bachelor's Degree
- average enrollment date of ~3938 days

We can retain more revenue as they are more likely to accept campaigns out of all customers and have higher spending rates in that category

# Thanks!
